

Jeremy Stocker

SENIOR FRONTEND ENGINEER

As a seasoned Senior Software Engineer with a deep passion for JavaScript and its ecosystem, I specialize in crafting enterprise-level applications utilizing React, TypeScript, Node.js, and Azure. My expertise primarily lies in front-end engineering, complemented by a robust background in UI/UX design, backend engineering, and DevOps. Known for my creative and forward-thinking approach, I excel in driving projects from conception to deployment, ensuring both technical excellence and user-centric design.

6+ years ReactJS experience • Strong UI/UX design capabilities

Personal Projects

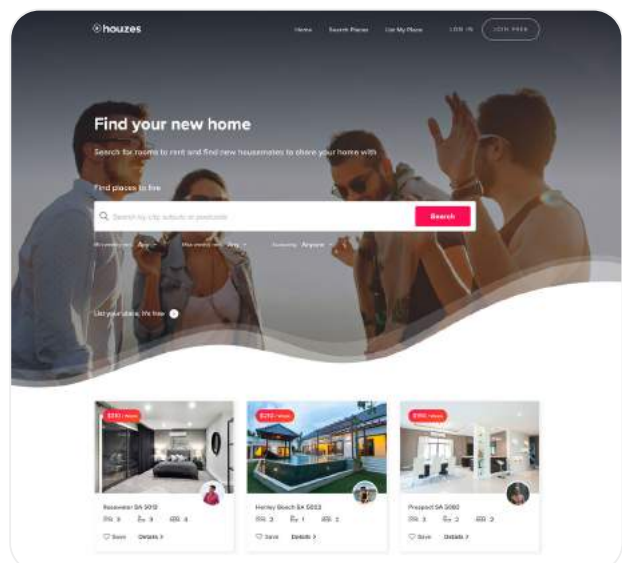

HOUZES AUSTRALIA

My passion for software development extends beyond my professional career into personal projects, driven by a deep-seated enthusiasm for software engineering. Recognizing the value these projects add in showcasing my skills and capabilities, I am proud to highlight one of my initiatives: 'Houzes'. This project is a high-performance web application designed for listing rental rooms and connecting individuals seeking flatmates.

Tech Stack & Features:

- React, Redux & Typescript
- Azure DevOps for CI/CD
- Azure Function Apps
- Azure API Management
- Distributed Tracing with AppInsights
- Cosmos DB / Mongo DB
- Custom Token Based Authentication
- Custom Stripe Integration (3D secure)

URL: www.houzes.com.au

Experience

10+ YEARS EXPERIENCE

Throughout my career I have been responsible for designing and implementing efficient, intuitive, modular and testable code within a variety of front-end codebases, while ensuring that solutions developed address a variety of concerns, including performance, scalability, availability, accessibility, and security. With excellent communication skills both written and verbal, this has assisted in providing a comprehensive understanding of current and emerging technologies, whilst knowledge sharing with and mentoring other developers within the organisations I have operated in.

Employment

WORK HISTORY
